

Five Drugs That Are Ruining Teens

smoking

Smoking causes cancer, heart disease, stroke, lung diseases, diabetes, and chronic obstructive pulmonary disease (COPD), which includes emphysema and chronic bronchitis

Smokeless tobacco

Smokeless tobacco use can cause gum disease, tooth decay, tooth loss and the formation of white or gray patches inside the mouth called leukoplakia that can lead to cancer

Alcohol

In a survey of alcohol users, approximately 66% indicated that alcohol was the first substance they'd ever used

Marijuana

adolescents who smoke marijuana are 85 times more likely to use cocaine than non-marijuana users

Drug injection

Many people experience cold sweats, insomnia, extreme weight loss, seizures, and chest pains. Side effects may also vary based on gender.

"DO NOT USE DRUGS"
